ABOUT ME

Full-stack Software Engineer with over five years of experience across web, mobile, and event-driven backends (TypeScript/Node.js, Go, Dart/Flutter). Owner of production services in a multi-tenant chatbot platform, with verifiable repository evidence: 128 repositories contributed to (94 personal, 26 in the product organisation — 92 of them private), 3,977 commits, 218 pull requests authored and 175 reviewed. Day-to-day work covers containerised microservices on Docker and Docker Compose, RabbitMQ and Google Pub/Sub messaging, PostgreSQL/Redis/MongoDB storage, GitHub Actions CI/CD, and Terraform-provisioned GCP and Byteplus infrastructure. Comfortable across the stack — React/Next.js frontends, Flutter apps, and API design with OpenAPI — and used to code review, service ownership, and production incident response.

WORK EXPERIENCE

PT Integra Putra Mandiri - Jakarta, Indonesia - Permanent
Software Engineer – Full-stack Developer (owner: CMS; contributor: broadcast, middleware, chatbot flow engine)
Mar 2025 - Present

- Own the platform CMS frontend (Next.js App Router, Tailwind CSS, Motion) — 147 of 182 commits on the repository (81%), including design system components and release workflows.
- Integrated Meta Catalog into the chatbot platform and enabled Catalog Messages plus conversion events through the Meta Cloud API.
- Extended the event-driven broadcast engine (RabbitMQ, etcd service discovery, object storage) — 7 GitHub Actions workflows covering code quality, Docker builds, and releases.
- Authored OpenAPI interface specifications for gateway services (177 declared API paths) as the contract between frontend and backend teams.
- Developed a Flutter mini-game for a philanthropy donation app, connecting gameplay with the chatbot flow to lift in-app engagement.
- Contributed across 26 repositories in the product organisation (1,420 commits) and resolved production incidents, improving stability and recovery time.

PT Admin Pintar Kita - Jakarta, Indonesia - Probation
Frontend Developer
Feb 2025 - Feb 2025

- Introduced React SWR for API caching and built reusable Next.js components to keep design and logic consistent across pages.

PT Eka Nusantara Gemilang - Jakarta, Indonesia - Permanent
Software Development Specialist – Full-stack Developer
Aug 2023 - Dec 2024

- Designed and implemented event-driven services on Google Pub/Sub with a microservices architecture (RabbitMQ, Redis, PostgreSQL, MongoDB).
- Integrated WhatsApp chatbot systems through the Meta Cloud API, handling catalog messages and conversion events.
- Built a broadcast engine on Pub/Sub and microservices for scheduled, high-volume campaign delivery.
- Led code reviews focused on DRY principles, performance optimisation, and automated testing (Jest, Sinon, Chai).

PT Smartfren Telecom - Jakarta, Indonesia - Permanent
Software Engineer – Mobile, Frontend & Backend Developer
Jun 2022 - Aug 2023

- Developed Flutter mobile sales applications used daily by field sales teams.
- Developed the 1ENGAGE mobile app using React Native.
- Migrated the 1ENGAGE frontend from Quasar to Next.js and the backend from Go to Express.js to improve maintainability and simplify the toolchain.
- Designed a reusable chatbot engine with flexible use case support.

PT Imani Prima - Bandung, Indonesia - Contract
Mobile, Frontend & Backend Developer
Mar 2022 - May 2022

- Developed mobile and web apps using Flutter and managed data models in MongoDB and MySQL.
- Integrated MQTT and WebSocket protocols using Go for device communication.

PT Skyshi Digital Indonesia - Yogyakarta, Indonesia - Contract
Mobile, Frontend & Backend Developer
Feb 2021 - Mar 2022

- Delivered mobile apps using Flutter and React Native based on Business Process Documents and UAT feedback.
- Integrated applications with REST APIs and Firebase.

ADDITIONAL EXPERIENCE

ChicodeFive - Side Project
Flutter Developer
May 2023 - Aug 2023

- Developed a hotel management application using Flutter with a reusable component library to keep pages consistent.

PROJECTS

- **Vet Management System**
  Next.js · Express.js · MongoDB · Docker Compose
  Clinic and cashier system for a veterinary practice: patients, medical records, and unified shop and doctor transactions. 239 of 546 commits; live demo available.
- **AI Assistant (Model Context Protocol)**
  Bun · Express.js · Zod · Playwright · MCP SDK
  Automation assistant built on the Model Context Protocol with browser automation — designed and implemented end to end (sole author).
- **Broadcast Engine**
  Node.js · RabbitMQ · etcd · Google Cloud Storage
  Event-driven mass-messaging engine for the chatbot platform: 7 CI/CD workflows covering code quality, Docker builds, and releases.
  (internal — walkthrough on request)
- **WhatsApp Chatbot Engine**
  Node.js · Express.js · Meta Cloud API · Google Pub/Sub
  Multi-flow chatbot engine handling catalogue messages and conversion events, with reusable flows shared across several products.
  (internal — walkthrough on request)
- **Mobile Suite (Flutter)**
  Flutter · Dart · Riverpod · FFmpeg · Google Sign-In
  Several Flutter apps built end to end: personal finance with local notifications, a password manager with biometric auth and encryption (121 commits), prayer times with background jobs, and background media backup using FFmpeg (65–121 commits each).
- **Invitation Backend Service (Go)**
  Go · Fiber · AWS S3 · Docker Compose · GitHub Actions
  Backend service for the wedding invitation platform: REST API and object storage integration in Go, containerised with Docker Compose and released through CI — 74 commits, the largest Go codebase I maintain.
- **Cloud Infrastructure 4-Tier (Terraform)**
  Terraform · GCP · Byteplus · PostgreSQL · Redis
  VPC, application and API servers, PostgreSQL and Redis provisioned as code with GCP, Byteplus, and Vault providers — 61 of 62 commits (98%).
  (internal — walkthrough on request)

EDUCATION

Universitas Brawijaya - Malang, Indonesia
Bachelor of Computer Science
Aug 2017 - Jan 2021
Cumulative GPA: 3.66/4.00

ADDITIONAL INFORMATION

- Architecture : Microservices, Event-Driven Architecture, API Gateway (APISIX), Service Discovery (etcd), OpenAPI/REST
- Backend : Express.js, Node.js, Go, Python, Elysia, Zod
- DevOps & Infra : Docker (multi-stage), Docker Compose, GitHub Actions CI/CD, Terraform
- Cloud & Storage : Google Cloud Platform, Byteplus, Firebase, MinIO (S3)
- Messaging & Realtime : RabbitMQ, Google Pub/Sub, Kafka, Socket.IO/WebSocket, SIP/VoIP (Asterisk), MQTT
- Frontend : React.js, Next.js, Tailwind CSS, Ant Design, Redux Toolkit, TanStack Query
- Mobile & State : Flutter, Dart, React Native, Riverpod, Bloc, Provider
- Database : PostgreSQL, MongoDB, Redis, MySQL
- Observability : Prometheus, Grafana, Loki, Thanos, Winston, GCP Cloud Logging
- Testing : Jest, Sinon, Chai, Testing Library, Storybook, Playwright
- Data : Apache Airflow, BigQuery
- Tools : Git/GitHub, GitLab, ESLint, Prettier, Figma, JIRA
- Languages : TypeScript, Go, Dart, Python

LANGUAGES

- Bahasa Indonesia : Native
- English : Intermediate
